

STINGS

Students with a history of allergy to stings should be known to all school staff. An emergency care plan should be developed.

Does student have:

- Difficulty breathing?
- A rapidly expanding area of swelling especially of the lips, mouth or tongue?
- A history of allergy to stings?

NO

A student may have a delayed allergic reaction up to 2 hours after the sting. Adult(s) supervising student during normal activities should be aware of the sting and should watch for any delayed reaction.

- Remove stinger if present.
- Wash area with soap and water.
- Apply cold compress.

Contact responsible school authority & parent or legal guardian.

NO

Refer to student's emergency care plan.

If available, administer approved medication.

Call EMS 9-1-1

- Check student's airway.
- Look, listen and feel for breathing.
- If student stops breathing, start CPR. Refer to "CPR."

Refer to
"Allergic Reaction."
