

TEETH PROBLEMS

BLEEDING GUMS

Bleeding gums:

- Are generally related to chronic infection.
- Present some threat to student's general health.

No first aid measure in the school will be of any significant value.

Contact
responsible
school authority &
parent/legal guardian.

**URGE DENTAL
CARE**

TOOTHACHE OR GUM INFECTION

Refer to "Mouth &
Jaw" for tongue, cheek, lip,
jaw or other mouth injury
not involving the teeth.

These conditions can be
direct threats to student's
general health, not just
local tooth problems

No first aid measure in the school will
be of any significant value.

Relief of pain in the school often postpones
dental care. Do **NOT** place pain relievers
(e.g., aspirin, Tylenol) on the gum tissue of the
aching tooth. They can burn tissue.
