

CUMBERLAND COUNTY SCHOOLS ACADEMY OF GREEN TECHNOLOGY

Douglas Byrd
Denise Renfro, Director
deniserenfro@ccs.k12.nc.us

The Academy of Green Technology focuses on clean energy, the electric grid and the relationship of these topics to our current climate challenges. There is no topic more important than energy going forward. Whether students end up in the clean tech sector or not, they should be knowledgeable of green tech and climate topics to be informed voters, make wise purchases and take care of their environment. Our mission is to prepare students to be the visionary leaders and innovators of the next generation. They will pursue vital technical and collaborative skills necessary to drive the emerging green and global economy.

Courses Offered:

- Sustainable Conservation
- Drone Fundamentals
- Generating Clean Electrons
- Drone Technology I
- Drone Technology II
- Advanced Studies (EV Car)
- AP Environmental
- Advanced Studies Transportation (EV Car Build)
