Cumberland@home Live is a virtual math tutoring service designed to support the academic needs of middle school math students outside of traditional school hours. Students can speak with a CCS math educator on Tuesdays and Thursdays from 5:00 pm to 7:00 pm via Webex to seek assistance with math content. This additional support is provided to maximize student learning in math and supplement the remote learning experience. This service does not replace a math teacher's instructional time or office hours. It is intended to serve as an extension of academic support provided for all secondary math students in CCS. Students can access math tutors by completing the sign-up form. Please review the flyer for additional information.
